Investment objective

FIB Garant is a conservative mutual fund, inception on Nov 11, 2007, whose investment objective is to achieve medium long-term growth of its assets, bearing low level of risk. The Fund invests mainly in fixed-income and money market instruments, but it may have up to 20% exposure to equity used to improve its risk-return profile.

FIB Garant's 2018 investment strategy includes significant allocation to Bulgarian equities on valuations and sentiment improvement on the BSE. At certain points investments in foreign large cap dividend-paying blue chips can be made but currency risk should be controlled. Low local deposit rates would also lead to an increase in the Fund's exposure to foreign corporate and sovereign bonds.
