FIB CLASSIC – MONTHLY REVIEW

NOVEMBER 2009

General Info:

FIB Classic is a balanced mutual fund, incepted on Nov 11, 2007, whose investment objective is to achieve long-term growth of Fund's assets, bearing medium levels of risk to its investors. The Fund currently is focused on equities and corporate bonds, traded on BSE Sofia, where the asset allocation depends on prevailing macroeconomic conditions.

Fees	
Entry fee (less than BGN 100,000)	0.35%
Entry fee (above BGN 100,000)	0.00%
Redemption fee	0.35%
Management fee(annual % of average AUM)	2.50%

Investment Strategy

FIB Classic invests mainly in value stocks with solid fundament and in corporate bonds, which should fall into investment grade, according to our research. The equity portfolio is diversified between 5-15 stocks.

- Due to the accelerating GDP decline in Bulgaria, negative outlook for 2010 and high market volatility, FIB Classic continued to implement conservative short-term strategy in November and placed most of its assets in deposits and other cash equivalents.

- According to our analyses, term deposits in Bulgaria were still more attractive than local corporate bonds issues that would fall into investment grade.

- In November FIB Classic has decided to decrease its investments in less liquid companies due to their increased volatility.

FIB Classic vs. BGTR 30

NOTES:

Monthly return /MoM/ is calculated as the ratio between the NAV/share as per the report date and the NAV per share on the last working day of the previous month.

Annual return /YoY/ is calculated as the ratio between the NAV/share as per the report date and the NAV per share on the last working day of the same month a year ago.

Year-to-date return /YtD/ is calculated as the ratio between the NAV/share as per the report date and the NAV per share on the last working day of the previous year.

Standard deviation is the annualized standard deviation of the weekly return over the last five years or since inception, whichever is smaller.

Алфа (α) –BGTR30 is the difference between the annual return of NAV per share of FIB Classic and the annual return of BGTR30 over the last three years or since inception, whichever is smaller.

Бета (β) – BGTR30 has been calculated using the weekly returns of NAV per share of FIB Classic and BGTR30 over the last five years or since inception, whichever is smaller.

R^2 – BGTR30 has been calculated using the weekly returns of NAV per share of FIB Classic and BGTR30 over the last five years or since inception, whichever is smaller.

Sharpe Ratio has been calculated using the weekly returns of NAV per share of FIB Classic over the last five years or since the inception of the fund, whichever is smaller, and using 0% as risk-free return.
